### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 10-18, 21-29, 43, 45, 48, 49 and 51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greatbach US 5609276 in view of Gross et al US 6477743 and Francois 6,286,733.

Greatbach shows a hollow cap comprising a sidewall 1, top 5, post 10, support 11 and internal ring 13. Greenbach shows in figure 2 the support structure 11 contacting inner surface of the top 5.

Greatbach lacks the receiver piece locked by a snap fit with the cap ring. Gross et al show a cap ring having a snap bead 140. It would have been obvious to one of ordinary skill in the art to have substituted the threaded coupling of Greatbach with a snap fit coupling as taught by Gross et al as an alternative equivalent means for coupling a receiver with a cap.

Greatbach lacks the cap top having a ledge and the cap engaging a receiver with a push pull motion. Francois shows a cap engaging a receiver with a push pull motion and having a ledge 240 to facilitate flow control and gripping. It would have been obvious to one of ordinary skill in the art to have modified the Greatbach cap top having

engaging a receiver with a push pull motion and a ledge as taught by Francois to facilitate flow control and gripping.

***Allowable Subject Matter***

Claims 1 and 3-7 are allowed.

***Response to Arguments***

Applicant's arguments with respect to claims 8-18, 20-29 and 49 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

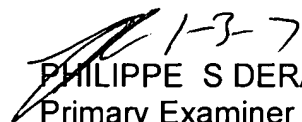

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
